

● NOW IN PRIVATE BETA

Win more deals with proposals clients sign in minutes.

UltraQuote is the all-in-one proposal and quoting platform for any team that sends quotes — build multi-option quotes from your product catalog, write a polished proposal with AI, and collect a legally-binding e-signature, all in one place.

faster quote-to-signature

Unlimited

quotes & previews

1 tool

catalog · proposal · e-sign

EVERYTHING IN ONE WORKFLOW

From product catalog to signed deal — without the copy-paste.

Stop stitching together a spreadsheet, a Word template, and a separate signing tool. UltraQuote does the whole proposal lifecycle.

Product catalog & pricing tiers

Import your products via CSV and price them with multiple tiers, setup fees, and billing periods. Line items snapshot catalog pricing so sent quotes stay stable.

Multi-option scenarios

Present “Good / Better / Best” side by side in a single quote. Star a recommended option and let clients choose the package that fits.

Rich proposal editor

A full document editor with two-column layouts, your branding, merge fields, and embedded live pricing tables — not just a flat PDF.

AI writing assistant

Powered by Google Gemini: generate, expand, shorten, or re-tone proposal copy in context, and even extract pricing tables from existing documents.

Built-in e-signature

Send for signature with client and counter-sign roles, initials, checkboxes, and choice fields. Status flips to signed automatically — live.

Your brand, your way

Upload your logo, pick an accent theme, choose your proposal font, and add a custom domain. Clients see you — not us.

Teams & roles

Templates & reuse

Invite teammates with owner/member roles, quote ownership, and presence indicators so two people never clobber each other's edits.

Save any proposal as a reusable template, import from Word/Markdown, and start new quotes from a template in one click.

Secure by design

Multi-tenant isolation, two-factor authentication, password policies, idle auto-logout, and per-tenant data separation built in.

HOW IT WORKS

Four steps from inquiry to signed contract.

1

Build the quote

Pull products from your catalog, add scenarios, and apply per-line discounts. Totals, tax, and margins calculate instantly.

2

Write the proposal

Draft the narrative with AI assistance, drop in live pricing tables, and brand the document with your logo and font.

3

Send for signature

4

Track & win

Preview the PDF, then send for e-signature.
Your client signs online; you counter-sign —
no printing, no scanning.

Watch status flip from sent → viewed →
signed in real time, with a dashboard of
pipeline value and win rate.

PRICING

Simple, usage-based pricing — built around signed deals.

UltraQuote is currently in private beta. Quotes are always unlimited, and plans are designed so you pay for outcomes, not effort. We'll help you find the right fit.
